Cool Roof®

... low temperatures at lower costs

Cool Roof® is a breakthrough technology that will revolutionise our roofing system to provide us with a more economical and better solution.

Here are some frequently asked questions!

Q) Where can the Cool Roof® be applied and used?

A) The technology can be applied to new as well as old constructions (Please refer to pictures to the left) and is designed to work in various places including: warehouses, factories/ industrial shades, commercial/ retail locations, parking lot, residential ceilings etc. **Cool Roof®** can be applied to any place where the temperature needs to be lower than the outside without spending large sums of money.

Q) How will using Cool Roof® technology instead of other common alternatives save me money?

A) Using **Cool Roof®** technology will save you money not only immediately but also in the long term.

Immediately:

- If you are constructing a brand new shade, **Cool Roof®** sheets do not require a heavy support system like the alternatives, you will save about 35% in construction costs.
- **Cool Roof®** sheets do not require colouring and near zero maintenance.

Long term:

- The minute you install **Cool Roof®**, you will start saving on your electricity and power costs.
- A worker who is working under a **Cool Roof®** compared to standard roof will be able to work longer and better since he/ she will be in a cooler and more comfortable work condition.
- A machine's life will also increase since the wear and tear will be drastically reduced in lower temperatures.
- **Cool Roof®** is water seepage proof hence saves money on repairing of leakages every year during the monsoons.

Q) What is the technology behind Cool Roof®?

A) The patented technology behind **Cool Roof®** uses a sandwich of various high quality insulated materials along with the Venti-Net technology from Germany to create a strong yet economical roofing solution.

Q) How long will it take to install Cool Roof® at my property?

A) **Cool Roof®** is very simple to install and will be finished much quicker than the more expensive and soon to be obsolete alternatives.

Q) Is this technology proven?

A) Yes, this technology is proven and is being used all over the world. It has become the standard in the Middle East (U.A.E.) and Africa.

Q) What else does Cool Roof® have to offer?

A) All **Cool Roof®** constructions come with a 1 year standard warranty. A wide variety of colours are available to enhance your property's look and feel.
