### Available Flow Options

## Nipples / Teats

## 1 Standard Neck

### Round Nipple / Teat

Fully round tip ensures correct mouth position and is seen as the most natural options. Fits standard and wide-neck bottles.

## 2 Standard Neck

### Orthodontic Nipple / Teat

Flattened shape mimics breastfeeding and adapts to baby's mouth. Suitable for all bottle types.

## 3 Wide Neck

### Round Nipple / Teat

Fully round tip ensures correct mouth position and is seen as the most natural options. Fits standard and wide-neck bottles.

## 4 Wide Neck

### Orthodontic Nipple / Teat

Flattened shape mimics breastfeeding and adapts to baby's mouth. Suitable for all bottle types.

### Available Flow Options

**LSR Products**

1

## LSR Spouts

Soft yet durable, the silicone spout promotes easy sipping while being gentle on developing gums and teeth.

2

## Straw With Weighted Ball

Designed to follow liquid at any angle, the weighted straw ensures uninterrupted sipping for active little ones.

3

## LSR Sipper Straw

Soft and bite-resistant, the silicone sipper straw offers a safe and gentle drinking experience for growing toddlers.

## Pacifiers & Soothers

1

### **Soother With Cap**

Comes with a protective cap to keep the teat hygienic and safe when not in use.

2

### **Orthodontic Pacifier**

Specially contoured to reduce jaw pressure, supporting healthy oral development and natural tongue movement.

3

### **Soother (Round)**

Closely mimics the shape of the mother's nipple, encouraging natural sucking and allowing comfort in any position.

4

### **Soother (Symmetrical)**

With its flattened shape on both ends, the symmetrical soother sits correctly in the mouth at all times, reducing strain on teeth and gums.

## SSR Products

1

### Bottle Handles

Ergonomically designed handles offer a secure grip, promoting independent bottle feeding for growing infants.

2

### Bottle Sleeves

Protective silicone sleeves enhance grip and insulation, safeguarding bottles against slips and temperature fluctuations.

3

### Bibs

Soft, absorbent bibs provide reliable protection against spills and dribbles, keeping your baby comfortably clean throughout feeding.

4

### Teethers

Safe, soothing teething toys support oral development while relieving discomfort during teething with gentle textured surfaces.

## Sippers & Tumblers

1

## Sippers

Spill-resistant, support a smooth transition from bottle to sipper, with ergonomic designs tailored for little hands.

2

## Tumblers

Lightweight and durable, baby tumblers encourage confident self-drinking with easy-grip shapes and soft spouts.

3

## Cups & Training Sets

A complete weaning solution, the training set fosters independent feeding with coordinated utensils designed for tiny learners.

## Breast Feeding Products

1

## Manual Breast Pumps

Efficient and gentle, our breast pump ensures discreet milk expression with optimal comfort and convenience for mothers.

2

## Milk Storage Containers

Leak-proof and freezer-safe, these containers preserve expressed milk securely while maintaining hygiene and freshness.

3

## LSR Nipple Shield

Ultra-soft and flexible, the silicone nipple shield offers a comfortable breastfeeding experience while aiding latch and flow.

## Accessories

1

### Bowl With Spoon

Ergonomically crafted for tiny hands and mouths, the bowls and spoon set supports mess-free, independent feeding.

2

### Fruit Feeder

A safe introduction to solids, the fruit feeder allows babies to explore fresh flavours while reducing choking risks.

3

### Bottle Drying Rack

Designed for organised air-drying, the rack keeps bottles and components upright, clean, and ready for the next feed.

4

### Steriliser

Effectively eliminates harmful bacteria, ensuring bottles and accessories remain hygienically clean and baby-safe.

Toys

1

## Water Filled Teethers

Gently chilled for soothing relief, water-filled teethers help ease teething discomfort while encouraging healthy oral development.

2

## Rattles

Lightweight and engaging, rattles stimulate sensory exploration and motor skills with safe, easy-to-hold designs for little hands.

# Menstrual Hygiene

1

### **Small (15 ml)**

Easy to insert, perfect for under 18 or first time users, recommended for teenagers.

2

### **Medium (20 ml)**

Designed for women under 30 with moderate flow, combining comfort with reliable capacity.

3

### **Large (30 ml)**

Ideal for women over 30, post childbirth, or with heavy flow.

4

### **Steriliser**

Perfect for quick, effective sterilisation, keeping your cup clean, safe, and ready for reuse.
